6TH EUROPEAN CONGRESS ON VIOLENCE IN CLINICAL PSYCHIATRY

*“Assessing, treating and caring
for potentially violent patients”*

**21 – 24 October 2009 - City Conference Centre
Folkets Hus – Stockholm - Sweden**

INVITATION

Dear Colleagues,

On behalf of the scientific committee we would like to invite psychiatric clinicians, psychiatrists, practitioners, psychiatric mental health nurses, psychologists, health scientists, educators, trainers, researchers, managers, and policymakers engaged in the management, study or treatment of aggressive behaviour of psychiatric patients to the 6th European Congress on Violence in Clinical Psychiatry.

This time the congress will be held in Stockholm from the 21st till the 24th of October 2009. Since the first European Congress on Violence in Clinical Psychiatry – which was also held in Stockholm in 1992 - the congress has expanded rapidly with regard to the number of scientific contributions and participants.

We hope again to attract a large multidisciplinary audience to the 6th congress to share their expertise on how to reduce, manage and treat aggression across disciplines and borders. In line with earlier editions, the 6th European Congress on Violence will focus strongly on clinically relevant and practically useful interventions aiming at treating and reducing violent behaviour of psychiatric and forensic patients. Hence the overall congress theme “Assessing, treating and caring for potentially violent patients”. The choice of this theme expresses the need for further bridging the gaps between research on measurement and prediction tools and risk assessment on the one hand, and clinical treatment and prevention of aggressive behaviour at the patient, ward or institutional level on the other hand. At the ward level, there indeed seems to have been a rise in the number of studies during recent years in which violence prediction instruments are combined with (standardized) intervention options, assisting ward teams in preventing violence and the use of coercive measures in concrete ways.

The broad multidisciplinary scope of the European Congress on Violence in Clinical Psychiatry is expressed in the various subthemes that will be addressed in Stockholm in 2009: “Risk assessment / prediction of violence”, “psychological treatment and therapies for aggressive patients”, “pharmacological treatments”, “biological factors of violence”, “methods for reducing coercive measures”, “consumer perspectives”, “legal and ethical perspectives”, “assessment and treatment of auto-aggressive and suicidal behaviour”, and “assessment and treatment of sexual violence”.

As was the case for the previous congresses held in Vienna (2005) and Amsterdam (2007), all scientific contributions to the 6th European Congress on Violence in Clinical Psychiatry will be collected in a publication reflecting the current state of knowledge about, and research on, the prevention and treatment of aggressive behaviour of psychiatric patients. We hope that the 6th European Congress on Violence in Clinical Psychiatry will prove to be helpful to the participants and lead to improvements in the care for, and quality of life of, patients for whom aggression is part of their psychiatric disorder.

We thus cordially welcome you in Stockholm in October, 2009!

*Prof. Henk Nijman, Ass. Prof. Tom Palmstierna & Dr. Ian Needham
Chairs of the scientific committee of the 6th European Violence
in Clinical Psychiatry Congress*

Nico Oud - Congress Organiser

Language

The official language of the congress is English.

Venue

Wednesday 21 October 2009

Thursday – Saturday 22-24 October 2009

**Congress Violence in Clinical Psychiatry
visiting address & registration**

Stockholm City Conference Centre
Folkets Hus
Barnhusgatan 12-14
Stockholm - Sweden

The City Conference Centre

The City Conference Centre in the heart of Stockholm is the largest centrally-located meeting venue in Scandinavia. Folkets Hus, which was inaugurated in 1960, was built to house numerous activities in an exciting architectural environment. The Conference Hall forms the heart of the building and can seat up to 1,400 people. Circling the Conference Hall are 17 congress rooms of varying sizes, exhibition spaces and restaurants. The present Folkets Hus was designed by the architect Sven Markelius and constructed in three phases during the 1950s. The building was inaugurated in June 1960. The former Folkets Hus was constructed on the same site and inaugurated in 1901.

Welcome Reception at the City Hall (free)

All participants are invited by the Lord Mayor of Stockholm Mr. Bo Bladholm to attend a special Welcome Reception on 22 October 2009 in the evening from 19.00 – 21.00 hrs.

Special Social Event (Dinner + Entertainment)

You are invited to join us at the Congress Dinner in the Vasa Restaurant.

Exhibition

There will be an opportunity for a variety of companies, institutions and organisations to present themselves at a separate exhibition and sponsor the congress. Please feel free to contact the congress organiser for further information.

Art Exhibition

WPA Section on Art and Psychiatry presents

Art Exhibition

Temptation of Evil: Aggression, Violence and Self
